EXPERIENCE

Manulife
User Experience Design Intern, Fall & Winter 2020
Shaped the Manulife Retirement mobile app customer experience through user research and data-driven visual and architectural solutions, impacting the product's priorities and direction.

The Co-operators
Full Stack Developer Intern & Part-time, Winter & Spring 2019
Developed reusable components and styles to optimize time-to-market of client facing insurance app. Worked closely with designers and product owner to influence product direction based on developer effort.

IFDS Group
User Experience Design Intern, Spring 2018
Empowered internal business analyst teams by offering optimized work flows and file organization strategies based on user interviews and shadowing.

Freelance
Graphic & Motion Graphic Design, 2016 to Present
Created client-driven products in various mediums including: music videos, motion graphic animations, posters, logos, and social media ads.

PROJECTS

flowr
Progressive Web App, Vue.js, Vuex, Vuetify
Crafted a time management solution specifically for student, driven by personal gripes with existing tools and extensive user research. Designed & and developed from the ground up for desktop and mobile.

Clothing WebStore
Responsive Website, React, School Project
Owned research and design portion of project, constructing wireframes by identifying best practices by existing leaders in the field. Developed front-end for desktop and mobile.
